Built with Cursor

Maps get you there. They do not make you look.

1

Shortest path

Navigation ends at the pin.

2

Phone away

The walk itself is leftover time.

3

Missed places

Campus already has stories.

No fake statistics. Walking already happens. Discovery does not.

Explore → Walk → Discover → Collect

1

Explore

Pip scouts a real nearby place.

2

Walk

Fern turns it into a route.

3

Discover

Moss tells the grounded story.

4

Collect

Capture it. Walking fills eggs.

Bailey Hall, a real campus place.

Pick a squad pet, then tap Walk there.

Keep this slide up. Hand them the phone.

Demo Walk is ON · steps at the table are simulated

1–2 Pip explores. League-up. Practice walk.

3 Pick Bailey Hall. Start the 161 m walk.

4 Capture the landmark. Hide Expo tools.

A phone, a small API, the real world

- Facts and routes come from tools, not the model.
- Photon carries the same squad into iMessage.
- Designed and iterated in Cursor.

Walking earns creatures and landmarks

An egg fills as you walk. Demo walks on.

Meet Mochi — a rare Storyteller from a hatch.

Nova holds Bailey Hall.

Everyday walks. Extraordinary company.

Campus, hometown blocks, the path between classes — same loop.

Planned next — not shipped

Background tracking

Honest walks with the phone in a pocket.

A deploy that stays awake

Grok and turf up for a whole event.

Richer social exploration

Shared landmarks without a grind.

Try it on the phone. Ask us anything.
